

The \$100k/Month Email List

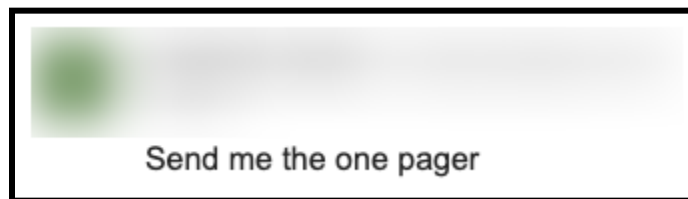

We want clients from email. But turning an email list into clients is the wrong goal because not everybody is client material.

Examples:

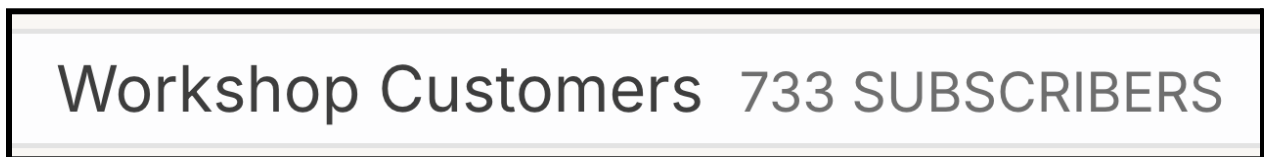

1. The Prague Guy (\$3,000)

2. The “Interested” Guy (\$1,200)

3. Workshop Customers (At least \$73,300)

If I saw my list as a way to get clients, I would never monetize them because I'd be making them an offer above the maximum amount they're willing to pay.

Everyone has a maximum they're willing to pay you. More than a way to get clients, your list is a way to extract that maximum.

Evergreen offers are a myth.

\$2 Billion Wall St. Journal Letter ("Tale of Two Young Men") ...

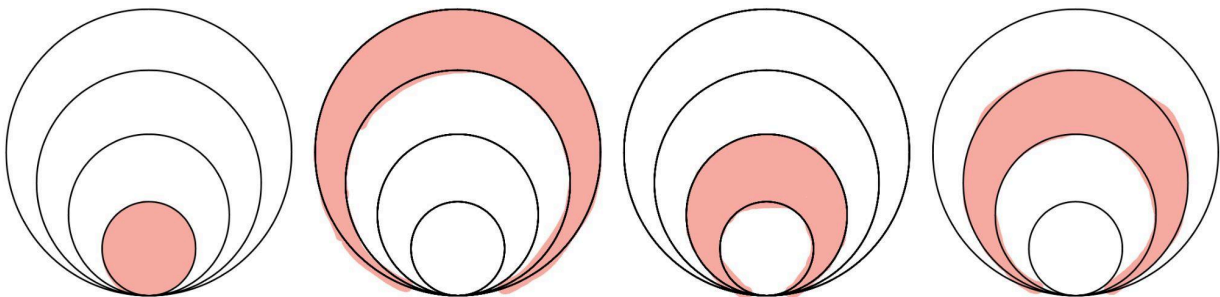

Below is what many consider "The Greatest Sales Letter of All Time." It sold **\$2 billion** worth of **Wall St. Journal** subscriptions & ran from **1975-2003** with.

Evergreen offers are a myth because people stop listening when they can predict you.

Understanding this liberates you to make better decisions because you don't hold on to the hope of finding one.

Instead you can take a more useful approach: Wavelength Selling.

The challenge is doing this without adding complexity. Having an Offer Shell makes it simpler because you can cycle through.

But eventually they will get used to them. When that happens, it's tempting to chalk it up to "I need more leads". This is not necessarily the wrong move.

But chances are you have plenty of untapped segments who want to pay you now. And you'd make more money faster if you did some Bundling & Unbundling like the Japanese.

Bundling & Unbundling

Japanese people understand how bundling and unbundling can help you sell more:

They don't look at their offer as a whole but as a mix of ingredients they can mix and match.

Take sushi:

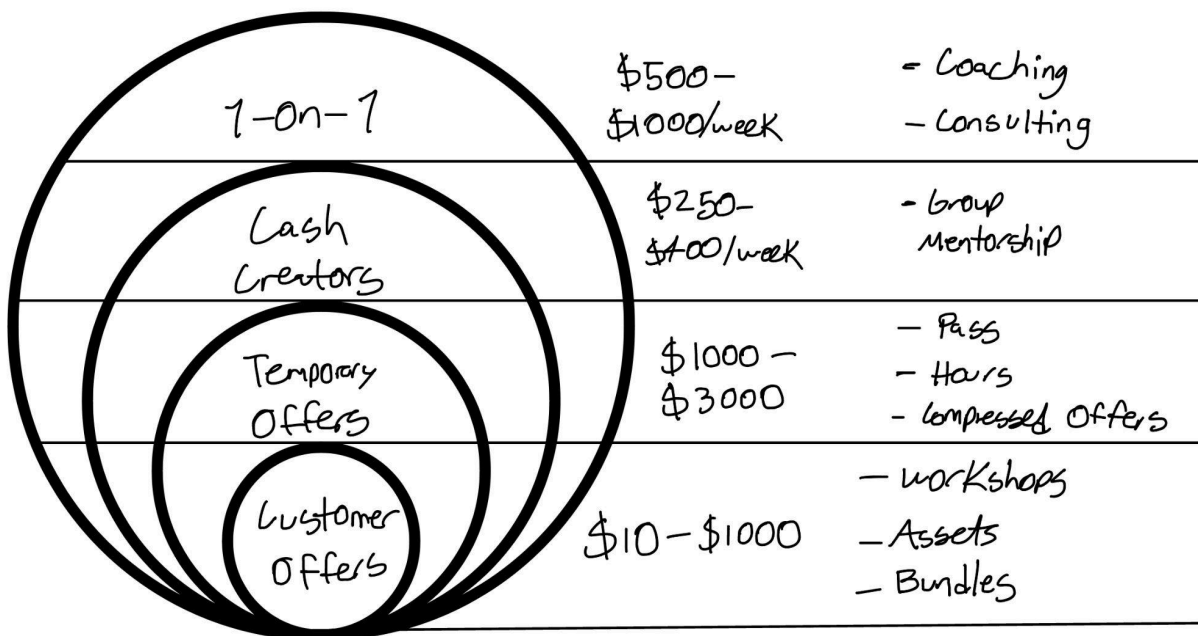

Bundling and unbundling is an easy and fast way to monetize more segments.

It creates products that appeal to different people:

These are my winners:

(Emphasis on my. Bundle and unbundle to find yours.)

Cadence

I generally give offers a 3-10 day lifespan and then switch. This is not a rule because if you have rules that means you're predictable. And if you're predictable you're ignorable.

The fix is in changing the way you look at your job.

You don't create for a living. You live for a living:

- Major events (Wedding)
- Trends you notice (AI)
- Meaningful events (birthday)
- Less meaningful events (travel)
- No reason (it felt right)
- Big reason (you're changing your approach)
- Any reason (client got a result with this and I thought it might benefit you:...)
- Purchase (finance my Cybertruck)
- Season (Summer)

What's going on in your life that made you want to make this offer?

Answering this not only gives you a strong "why". But it also frames you as a Protagonist. It has more pull.

Caveat: the higher folks are in your Shell the less offers are recommended because it gets weird.

For example I will make email subs an offer every day.

But I will only make clients an offer at most every month or privately when it makes sense.

Frequency

I make daily offers because I like getting paid daily.

This does repel a few folks. But it gets me 6 more chances per week to make a sale (and sometimes more).

Between repelling a few people off and more sales I choose to get more sales.

Plus people can't complain about getting punched if they're entering a boxing gym:

I send at least one email a day (which you may opt out of at any time).

If reading them makes you feel like we're not right for each other, the unsubscribe button is always at the bottom. It's the blue one. Hard to miss.

Welcome to the Likes Ain't Cash Newsletter.

JK

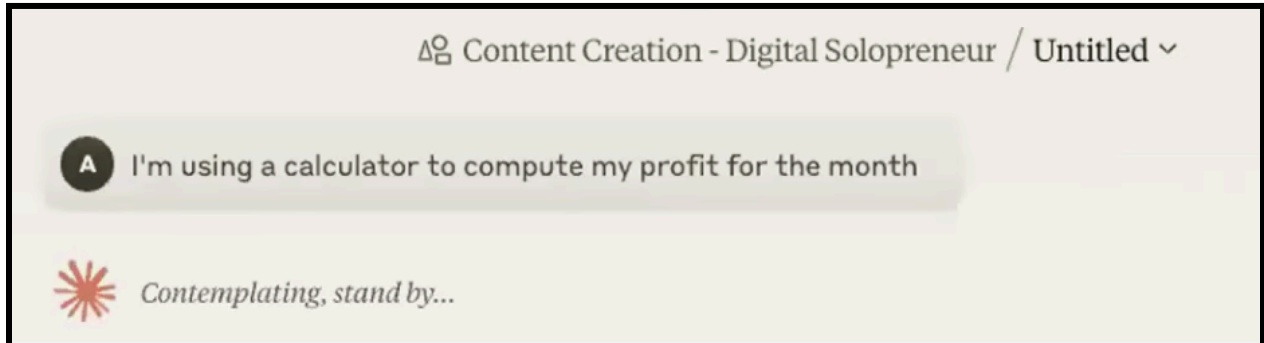

AI x Cash Creators

This past month 3 Cash Creators did 3 AI workshops that facilitate daily offers:

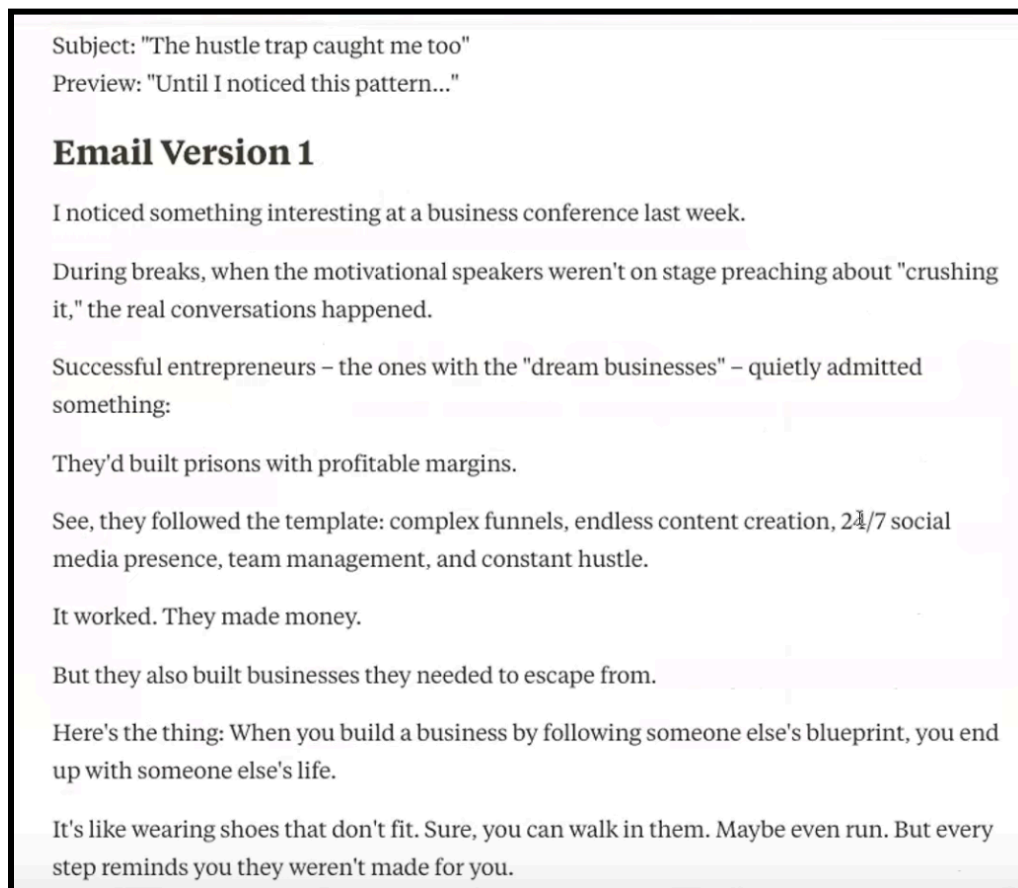

1. [Allan Ngo: Your Daily Email With AI](#)

Step 1) Train the AI Writer like he shows you (20 minutes).

Step 2) Write 1 sentence or upload 1 picture.

Step 3) Get your email.

2. [Felix Tay: Your AI Offer Doc](#)

- Step 1) Give it your goal.
Step 2) Let it question you to craft the doc.
Step 3) Have your offer and test it.

INVITATION

The AI Skip Button: Cut Your Marketing Work From 20+ Hours to Just 2 Hours Weekly

Experts spend 20+ hours weekly on the same tedious marketing tasks.

Write a post. Schedule content. Draft another email. Create another lead magnet.

The monotony is relentless.

And it steals time from the work you actually love: Coaching clients, building relationships, or simply enjoying your free hours.

Without a systematic approach, entrepreneurs find themselves trapped in a never-ending marketing cycle.

This leaves them with precious little time the freedom that entrepreneurship originally promised.

The AI Skip Button is a switch that reduces your marketing and sales workload from >20 hours to 2 hours weekly.

You'll convert more prospects into paying clients with less time and effort. You'll see more qualified leads turn into sales without manual chasing.

And reclaim 18+ hours every week to focus on client work, business development, or personal time.

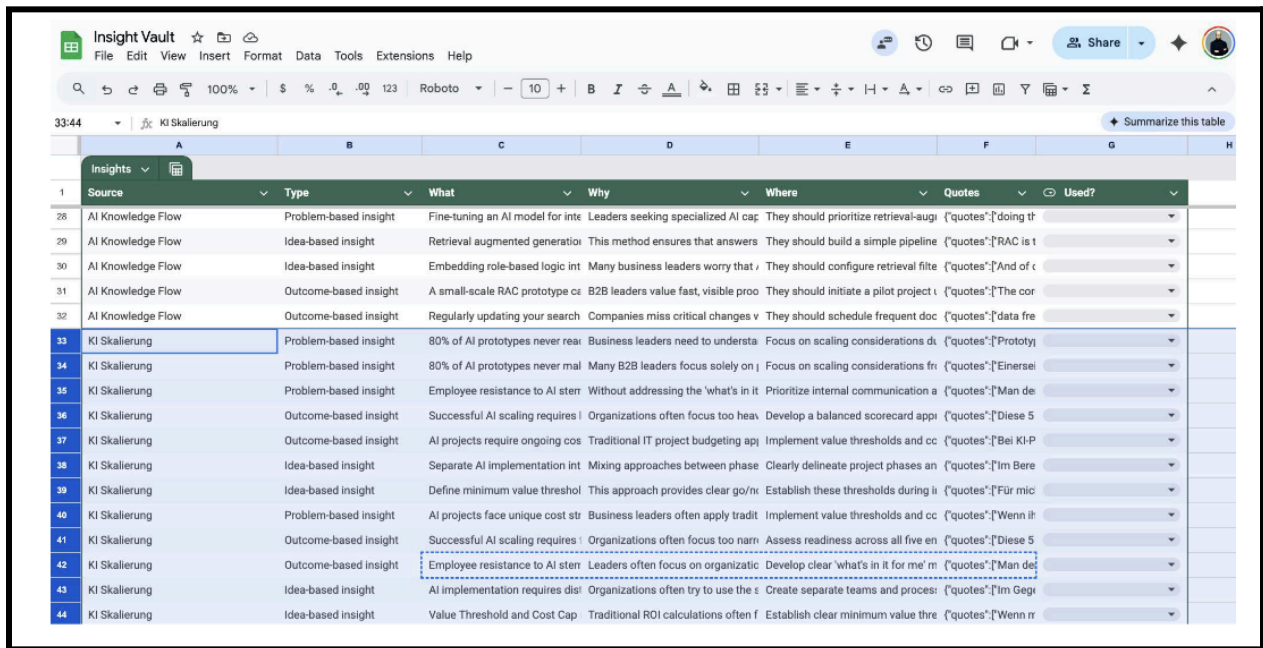

Marketing Task	Before AI Skip Button	With AI Skip Button
Long form written content for email marketing, LinkedIn, Facebook, and blogs	2 hours	Draft in 10 minutes, edit in 3 minutes
Video scripts	12-20 hours each	30 minutes each
Offer documents	8-12 hours each	30 minutes each

3. [Tobias Zwingmann: 1 Piece. 30 Insights.](#)

- Step 1) Install the AI Insightizer like he shows you (20 minutes).

Step 2) Record your calls with your phone.

Step 3) Get your Insight-Based Content.

The screenshot shows the 'Insight Vault' application interface. At the top is a menu bar with 'File', 'Edit', 'View', 'Insert', 'Format', 'Data', 'Tools', 'Extensions', and 'Help'. Below the menu is a toolbar with various icons for editing and viewing. The main area displays a table with the following columns: Source, Type, What, Why, Where, Quotes, and Used?. The table contains 14 rows of insights, each with a unique identifier (e.g., 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44). The insights are categorized by type (Problem-based insight, Idea-based insight, Outcome-based insight) and source (AI Knowledge Flow, KI Skalierung). The table is currently filtered to show insights related to 'KI Skalierung'.

Offense Is The Best Defense

Everyone has a maximum they're willing to pay you. Your email list is the best tool you've got to find them.

When an offer doesn't hit or it stops working don't dwell on it. Bundle and unbundle and make another one. This can be repeated infinitely so that you'll always have something to attack.

How To Use Cash Creators

1. Send your offers for feedback and findings so we can share ours with you too.
2. Use the AI Tools to make more offers.
3. You'll get people entering at all levels of your Shell. Use The Offer Shell Workshop for the templates on how to upsell to the next one. If you don't ask you don't get.
